EXPERIENCE

Brainsight AI

Bangalore, India

UI/UX Designer

Present

- Designed scalable UX flows for MRI-based clinical workflows by translating complex scenarios into clear interfaces
- Built admin dashboard UX from wireframes to high-fidelity screens for doctors and technicians
- Validated edge cases through workflow testing to ensure reliability across clinical situations
- Informed situation-based design decisions through domain and user research in neuroimaging

NxtGenAthleteTechLab

Remote

UI/UX Designer | Frontend Developer

May 2025 – Jul 2025

- Led product design for AthlezTech by mapping user jobs around performance tracking and training optimization
- Defined features aligned with user needs, business goals, and technical constraints through iterative discovery
- Built scalable user flows, prototypes, and a cross-platform design system to ensure consistency
- Built and optimized the marketing site with Astro for speed and modern brand appeal

EDUCATION

B.Tech, Computer Science – Pandit Deendayal Energy University

Aug 2023 – May 2026

Diploma, Computer Science – Bnb Institute of Technology

Aug 2020 – May 2023

SKILLS

Languages: HTML/CSS, JavaScript, PHP, Java, Python, SQL

Coursework: OS, Computer Networks, DBMS, Software Engineering (Agile), AI, UI/UX, DSA, OOP, Web Technologies

Frameworks/Libraries: React, Astro, Node.js, TailwindCSS

Tools: Figma, Adobe Illustrator, Adobe XD, Github, Postman

PROJECTS

GAIA | UI/UX, Frontend Developer

[View Project](#)

- Built Next.js and Tailwind CSS UI components including subscription and user cards
- Designed automation flows integrating calendar, to-dos, and email systems
- Prioritized features using RICE and MoSCoW to define product phases and cycles
- Researched core users and designed a clear, high-conversion landing page

AzkaDoc | UI/UX, Frontend Developer

- Designed diagnostic dashboard and landing page by translating user research into clear UX flows and screens
- Conducted UX research, usability testing, and market analysis to identify healthcare workflow pain points
- Built data-driven UI, visualizations, and UX case studies focused on usability, accessibility, and A/B testing
- Delivered end-to-end product design from research to high-fidelity screens for AI-powered healthcare tools

Resido | UX, User Research

- Identified users' core job: seamless home-service booking without app-hopping or unclear timelines
- Led UX research and end-to-end product design for booking, payments, and real-time service tracking
- Improved task clarity and completion through intuitive, mobile-first design validated by usability testing
- Designed scalable UX flows and screens to support multiple service categories and repeat usage

OPEN SOURCE TASK

Freelance | UI/UX, Re-mvp

[View](#)

- Redesigned landing page and MVP UI to improve clarity, positioning, and user understanding
- Designed mobile onboarding screens to streamline first-time user experience

Freelance | UI/UX, App Design

[View](#)

- Designed and delivered a 10+ screen mobile app aligned with client requirements and core user flows
- Improved UI components and visual consistency to achieve a clean, minimal, and usable interface
