EXPERIENCE

NxtGenAthleteTechLab

Lead Designer

Remote

Jun 2025 – Present

- Led full product design for AthlezTech app, from research and market analysis to UX strategy and UI delivery
- Defined features and aligned design with business goals and technical constraints
- Built user flows, prototypes, and a scalable design system for cross-platform consistency
- Developed and optimized the company website with Astro for speed and modern aesthetics

AzkaDoc

Product Designer

Remote

Nov 2024 – April 2024

- Designed the AI-integrated healthcare dashboard with advanced report-scanning features (X-rays, MRIs)
- Led UX research and market analysis to uncover pain points in digital healthcare solutions
- Created intuitive dashboards, AI-powered diagnostic tools, and data visualization interfaces to optimize workflows
- Developed UX case studies focused on usability heuristics, accessibility, and A/B testing insights

EDUCATION

Pandit Deendayal Energy University

B.Tech in Computer Science

Gandhinagar, Gujarat

Aug 2023 – May 2026

BnB Institute of technology

Diploma in Computer Engineering

Anand, Gujarat

Aug 2020 – May 2023

SKILLS

Languages: HTML/CSS, JavaScript, PHP, Java, Python, SQL

Design: UI/UX Design, Wireframing & Prototyping, Product Design, Logo Design, User Research & Usability Testing

Frameworks/Libraries: React, Astro, Node.js, TailwindCSS

Tools: Figma, Adobe Illustrator, Adobe XD, Github, Postman

PROJECTS

Resido | UX, User Research

[View Project](#)

- Designed the Resido SaaS platform, defining core features and functionalities for household services
- Built complete app flows for booking, payments, and service tracking to ensure a seamless UX
- Conducted user and market research to uncover pain points and inform product strategy
- Delivered intuitive, responsive UI designs in Figma to drive engagement and retention

Verdor App | UI/UX, User Research

[View Project](#)

- Designed Plant Care App, defining core features for plant scanning, care reminders, and growth monitoring
- Built intuitive app flows for task tracking, daily reminders, and a gamified reward system to boost engagement
- Conducted user research with plant lovers and vendors to identify needs and shape product strategy

Fallout E-commerce | Design, UI/UX

[View Project](#)

- Designed the Fallout e-commerce platform with key features, categories, and shopping flows
- Built intuitive UI/UX for product discovery, customization, checkout, and promotions
- Delivered a responsive design system for web and mobile, strengthening brand identity and CX

OPEN SOURCE

Void | Re-mvp, Product Design

[View Project](#)

- <https://github.com/WTWB-none/void>
- Designing the Plugins Dashboard, defining core features and functionalities for the open-source VOID platform
- Creating intuitive user flows and wireframes that streamline plugin management and configuration
- Delivering modern, scalable UI components and design systems to ensure consistency across the platform
