EXPERIENCE

NxtGenAthleteTechLab

Remote

Lead Designer

Jun 2025 – Present

- Led product design for AthlezTech by mapping user jobs around performance tracking and training optimization
- Defined features aligned with user needs, business goals, and technical constraints through iterative discovery
- Built scalable user flows, prototypes, and a cross-platform design system to ensure consistency
- Built and optimized the marketing site with Astro for speed and modern brand appeal

AzkaDoc

Remote

Product Designer

Nov 2024 – April 2024

- Translated user research into actionable product flows for an AI-powered diagnostic dashboard
- Led UX research and market analysis to uncover pain points in digital healthcare solutions
- Created intuitive dashboards, AI-powered diagnostic tools, and data visualization interfaces to optimize workflows
- Developed UX case studies focused on usability heuristics, accessibility, and A/B testing insights

EDUCATION

B.Tech, Computer Science – Pandit Deendayal Energy University

Aug 2023 – Present

Diploma, Computer Science – Bnb Institute of Technology

Aug 2020 – May 2023

SKILLS

Coursework: OS, Computer Networks, DBMS, Software Engineering (Agile), AI, UI/UX, DSA, OOP, Web Technologies

Frameworks/Libraries: React, Astro, Node.js, TailwindCSS

Tools: Figma, Adobe Illustrator, Adobe XD, Github, Postman

PROJECTS

Resido | UX, User Research

[View Project](#)

- Identified users' core job: booking home service providers seamlessly, without app-hopping or unclear timelines
- Led UX research and end-to-end product design for booking, payments, and real-time service tracking flows
- Improved task clarity and completion through intuitive, mobile-first design backed by usability testing

Verdor App | UI/UX, User Research

[View Project](#)

- Discovered users' need to simplify plant care tracking through personalized, gamified reminders
- Designed scanning, task scheduling, and growth monitoring features for both casual users and plant sellers
- Delivered an engaging experience that solved care-task gaps and boosted daily engagement

Fallout E-commerce | Design, UI/UX

[View Project](#)

- Identified users' core job: discovering and customizing unique apparel easily on both web and mobile
- Designed browsing, personalization, and checkout flows for minimal friction and strong brand identity
- Created a modular design system that improved navigation clarity and reduced bounce rate on early testing

OPEN SOURCE

Void | Re-mvp, Product Design

[View Project](#) | [GitHub](#)

- Designed effortless plugin management dashboard supporting the core job of managing tools with ease
- Designed a Lovecraft-inspired UI that merged clean usability with an immersive, thematic experience

GAIA | UI, Product Flow Design

[GitHub](#)

- Designed VUI flows and UI screens for GAIA's AI assistant to enable smooth and intuitive interactions
- Created launch poster and contributed to UI design for the beta release
